Model Test 1

Passage 1

题源：*Financial Times*　　题材：商业经济　　建议用时：7 分钟

Executive managers' pay is still determined by simplistic measures of performance that bear little relation to long-term drivers of companies' value, according to an analysis of pay at FTSE (Financial Times Stock Exchange) 100 companies over the past decade.

The research __1__ executive *remuneration* (报酬) over the 10 years from 2003-2013 at 30 FTSE 100 companies, and found there was __2__ correlation between the key performance indicators that companies highlighted to shareholders and the measures used to incentivize and reward senior staff. "Much of the discussion around executive compensation focuses on the __3__ of bonus payments," said Natalie Winter Frost, chairwoman of CFA UK. "The more important question centers around the way that performance is measured and consequently incentivized." The research found that chief executives' pay showed a low level of correlation with company performance, regardless of the specific measure of performance used. "A large __4__ of CEO pay appears unrelated to periodic value creation," said the report's authors.

Relatively simplistic performance measures such as earnings per share and total shareholder return continued to __5__ the criteria which were used to measure executives' performance over the period. Value-based metrics that __6__ performances to the cost of capital were rarely used. Earnings per share can be boosted by, for example, M & A activity that does not __7__ enhance profitability. The report said the dangers of over-reliance on such measures of executives' performance were well documented and included: "investment *myopia* (目光短浅), earnings manipulation, excessive risk-taking, and __8__ to organizational culture".

"There are __9__ flaws in current remuneration policies and whilst our report highlights that compensation practices have improved, the journey is far from __10__," said Ms Winter Frost.

A) ambiguous	F) examined	K) overworked
B) complete	G) extract	L) related
C) consensus	H) fraction	M) resources
D) dominate	I) magnitude	N) scant
E) evident	J) necessarily	O) threats

Passage 2

题源：*The New York Times*　　题材：社会生活　　建议用时：15 分钟

Risks for Youths Who Eat What They Watch

A) Many factors influence children's food choices: where they eat; what their friends and siblings eat; what parents eat and drink and bring into the house; what is served at school; and, of course, what they like.

B) But if you are a parent, would you want your children's food and beverage choices determined by

manufacturers whose primary goal is to make money by getting them hooked on products of questionable nutritional value? The issue is of particular importance now that rates of childhood obesity are soaring throughout the country, influenced in no small way by commercial interests. The obesity of children will do great harm to children, not only to their physical health, but also to their psychology. Since in today's world, people are attaching too much importance to the shape of their body, and children especially teenagers admire the skinny models walking on the stages. So if they are a little overweight, they will feel down and even gloomy. And what is more, the health of children will also influence the whole nation's finance since the more health problems appear, the more money the government will spend to solve these problems. So it is time for us to pay attention to what our children eat.

Too much sugar on TV...

C) Last month, the Center for Science in the Public Interest, a Washington-based advocacy group, gave a grade of F to 95 of 128 food and entertainment companies for their policies—or lack thereof—on marketing to children. This despite the Children's Food and Beverage Advertising Initiative started in 2006 by the Better Business Bureau, in which 16 major food and restaurant companies, representing about 80 percent of television food advertising expenditures, announced they would not market foods to children under 12 if they did not meet the companies' own nutritional standards.

D) Unfortunately, there's the rub. What a company like Kellogg's regards as an acceptable amount of sugar in a serving of breakfast *cereal* (谷类食品) may not be what a nutrition-wise parent would choose. The cutoff adopted by Kellogg's is 12 grams (3 teaspoons of sugar), which would keep them from promoting Cocoa Krispies (14 grams of sugar in a one-cup serving) to children. But Frosted Flakes, with 11 grams, could still be advertised in places where children 6 and older will see them. (The company does not aim advertising at children under 6.)

E) Also, since each company sets its own guidelines, what applies to Kellogg's might not apply to products made by General Mills or Post. "Despite the industry's self-regulatory system, the vast majority of food and entertainment companies have no protections in place for children," said Margo G. Wootan, the center's nutrition policy director. In the center's analysis of marketing to children, released last November, the highest grade, a B-plus, went to the candy maker Mars, which does not market to children under 12 and avoids other tricks that attract them.

F) "If companies were marketing bananas and *broccoli* (花椰菜), we wouldn't be concerned," Dr. Wootan said. "But instead, most marketing is for sugary cereals, fast food, snack foods and candy. And this junk-food marketing is a major contributor to childhood obesity." Furthermore, the analysis showed, although 64 percent of food companies that advertise to children at least have some sort of marketing policy, only 24 percent of restaurants and 22 percent of entertainment companies have any policy guiding advertising to children.

G) In a study released in March 2007, the Henry J. Kaiser Family Foundation noted that children ages 2 to 7 see an average of 12 televised food ads a day, or 4 400 a year, and children 8 to 12 see an average of 21 a day—more than 7 600 a year. For teenagers, the numbers are 17 a day, or more than 6 000 a year. Fully half of all ad time on children's shows is for food, the foundation reported.

H) "Most of the food ads that children and teens see on TV are for foods that nutritionists, watchdog groups and government agencies argue should be consumed either in moderation, occasionally or in small portions," the group found. "Of the 8 854 food ads reviewed in the study, there were no ads for fruits or vegetables targeted at children or teens."

I) In case you are wondering, several studies have demonstrated that television ads do indeed have an effect—and not a good effect—on what children eat, and how much. In one study of 548 students at five public schools near Boston, published in 2006 in *The Archives of Pediatric and Adolescent Medicine*, researchers found that for each additional hour of television viewing, the children consumed an additional 167 calories, especially the caloriedense, low-nutrient foods frequently advertised on television.

Too much sugar at the movies

J) Now, a new study suggests, it's time to attend to more subtle promotions of questionable foods, beverages and *eating*（餐馆）establishments that appear in movies popular among children and adolescents. "Movies," the authors stated, "are a potent source of advertising to children, which has been largely overlooked." The study, published in March in the journal *Pediatrics*, analyzed brand placements for foods, beverages and eateries depicted in the top 20 box-office hits for each year from 1996 to 2005. Of the 138 movies analyzed, 49 percent were rated PG-13, 20.5 percent were PG and 7.5 percent were G.

K) "We found that a surprising proportion of movies that were targeted to children and adolescents featured brand appearances," the authors wrote. Although Coca-Cola and Pepsi have long-standing commitments not to advertise their products on children's television, the researchers found that "sugar-sweetened beverage products from these companies regularly appeared in movies, especially those rated for children and adolescents."

L) Of the 1 180 brand placements identified, 26 percent of the food placements were for candy and other sweets and 21 percent for salty snacks; 76 percent of the beverages were sugar-sweetened drinks, and two-thirds of the restaurants were fast-food places. The researchers found that "soft drinks, chips and fast-food brands dominated PG-rated and PG-13-rated movies." The authors, led by Lisa A. Sutherland of Dartmouth Medical Center, found an average of 8.6 brand placements per movie, and concluded that most were "for energy-dense, nutrient-poor foods or product lines."

A harmful effect

M) Lest you doubt these brand placements influence young eating habits, the appearance of Reese's Pieces in the movie *E. T. the Extra-Terrestrial* resulted in a sharp increase in sales in the three months after the movie's release in 1982.

N) "Movie product placement is equal to subconscious advertising, yet it has been largely ignored by those who study the impact of marketing on children," the authors wrote. The authors expressed particular concern about the influence of brand placements in movies rated PG and PG-13 on older children and teenagers, "who are gaining independence with respect to their food choices." They noted that this "provides a likely avenue by which brand loyalty and product preference can be built."

O) What can you do? I wouldn't dare suggest passing up a wonderful movie like "E. T." But just as parents and others have objected to sugary drinks sold in schools and, to a lesser effect so far, to

foods advertised on children's television, it may be time to make your feelings known to movie producers about how brand placements are harming the health and increasing the weight of America's children.

11. The 16 major food and restaurant companies would not market foods to children under 12 until they met the nutritional standards.
12. According to a study released by the Henry J. Kaiser Family Foundation, half of ad time on children's shows is for food.
13. According to Dr. Wootan, a major cause of childhood obesity is junk-food marketing.
14. Researchers found that watching more TV led children to consume more calories.
15. Margo G. Wootan means that many food companies don't have any protective measures for children.
16. A lot of movies that were aimed at children and young people featured brand appearances.
17. The movie producers should be warned that brand placements do harm to the health and increase the weight of America's children.
18. Nutritionists think that children should eat foods advertised on TV occasionally.
19. Those who study the influence of marketing on children tend to ignore that movie product placement has the same effect as subconscious advertising.
20. The issue that ads influence children's food choices is important because more and more children are obese all over the country.

Passage 3

题源： *Newsweek* **题材：** 社会生活 **建议用时：** 9 分钟

It's 7:30 am on a wintry morning in downtown Stockholm and a sea of Swedes are flooding Central Station to catch a train to work. The station is *toasty*（暖烘烘的）thanks to the busy shops and restaurants and the body heat being generated by the 250 000 commuters who crowd Scandinavia's busiest travel hub each day. This heat used to be lost by the end of the morning rush hour. Now, however, engineers have figured out a way to harness it and transfer it to a newly refurbished office building down the block. These sweaty Swedes have become a green energy source: "They're cheap and renewable," says Karl Sundholm, a project manager at Jernhusen, a Stockholm real estate company, and one of the creators of the system.

Using excess body heat to warm a building is not a new concept—the Mall of America in Minneapolis recycles the heat generated from shoppers' bodies to help regulate the temperature of the massive complex during Minnesota's dreadful winters. But Stockholm has taken the idea a step further by successfully transferring excess body heat from one building to another. "This is old technology, but used in a new way," Sundholm explains. "It's just pipes, water and pumps, but we haven't heard of anyone else using this technology in this way before."

Here's how the system works: The heat generated by the commuters is captured by the station's *ventilation*（通风）system and used to warm water in underground tanks. The water is then pumped through pipes to the 13-story office building about 100 yards away, where it is incorporated into the main heating system. Not only is the system environmentally friendly, it's also cost-effective. In the long run, the company expects to lower the energy costs in the office building by as much as 20% per year. And constructing the new heating system, including installing the necessary pumps and laying the

underground pipes, only cost the firm about $30 000, Sundholm says. "It pays for itself very quickly," he adds. "And for a large building expected to cost several hundred million kronor to build, that's not that much, especially since it will get 15% to 30% of its heat from the station."

With its freezing winters, ecologically minded citizenry and high energy costs, Sweden has long taken a creative approach to heating its homes. Ulla Hamilton, Stockholm's deputy mayor, who is heavily involved in the capital's environmental, waste and recycling plans attributes this to the Swedish lifestyle. "Most Stockholmers have families living in the countryside so they have a specific relationship toward nature," Hamilton says. "Because of this, sustainability is a large part of our culture."

21. According to the passage, what can excess body heat be used for?
A) Providing electric power for the train.
B) Regulating the temperature in the train.
C) Generating electricity for the office building.
D) Providing heating energy for the office building.

22. In Sweden, the way of using body heat is new in that _____.
A) body heat is collected from the train station instead of the mall
B) body heat collected in one place can be used in another place
C) body heat is used to warm water
D) this way uses pipes, water and pumps

23. What does Sundholm mean by saying "It pays for itself very quickly"?
A) Body heat will lower the energy costs and save lots of money.
B) Body heat will bring a lot of profits for the company.
C) The cost of this kind of heating system is low.
D) Body heat will provide 15% to 30% heat for the office building.

24. According to Ulla Hamilton, why are the Swedes so keen on using green energy?
A) Traditional energy costs are too high for the Swedes.
B) The Swedes are involved in destroying the environment.
C) The rural area in Sweden is abundant in green energy resources.
D) The Swedes want to protect nature and keep sustainability.

25. What is the author's purpose of writing the passage?
A) To introduce body heat as a green energy in Sweden.
B) To analyze why the Swedes are so ecologically minded.
C) To remind the Swedes of the high energy costs.
D) To suggest ways of keeping sustainability.

Passage 4

题源： *The Economist*　　**题材：** 社会生活　　**建议用时：** 8 分钟

A recurring criticism of the UK's university sector is its perceived weakness in translating new knowledge into new products and services.

Recently, the UK National Stem Cell Network warned the UK could lose its place among the world leaders in stem cell research unless adequate funding and legislation could be assured. We should take this concern seriously as universities are key in the national innovation system.

However, we do have to challenge the unthinking complaint that the sector does not do enough in taking ideas to market. The most recent comparative data on the performance of universities and research institutions in Australia, Canada, USA and UK shows that, from a relatively weak starting position, the UK now leads on many indicators of commercialisation activity.

When viewed at the national level, the policy interventions of the past decade have helped transform the performance of UK universities. Evidence suggests the UK's position is much stronger than in the recent past and is still showing improvement. But national data masks the very large variation in the performance of individual universities. The evidence shows that a large number of universities have fallen off the back of the pack, a few perform strongly and the rest chase the leaders.

This type of uneven distribution is not peculiar to the UK and is mirrored across other economies. In the UK, research is concentrated: Less than 25% of universities receive 75% of the research funding. These same universities are also the institutions producing the greatest share of PhD graduates, science citations, patents and licence income. The effect of policies generating long-term resource concentration has also created a distinctive set of universities which are research-led and commercially active. It seems clear that the concentration of research and commercialisation work creates differences between universities.

The core objective for universities which are research-led must be to maximise the impact of their research efforts. These universities should be generating the widest range of social, economic and environmental benefits. In return for the scale of investment, they should share their expertise in order to build greater confidence in the sector.

Part of the economic recovery of the UK will be driven by the next generation of research commercialisation spilling out of our universities. There are three dozen universities in the UK which are actively engaged in advanced research training and commercialisation work.

If there was a greater coordination of technology transfer offices within regions and a simultaneous investment in the scale and functions of our graduate schools, universities could, and should, play a key role in positioning the UK for the next growth cycle.

26. What does the author think of UK universities in terms of commercialisation?

A) They have lost their leading position in many ways.

B) They do not regard it as their responsibility.

C) They fail to convert knowledge into money.

D) They still have a place among the world leaders.

27. What does the author say about the national data on UK universities' performance in commercialisation?

A) It does not reflect the differences among universities.

B) It masks the fatal weaknesses of government policy.

C) It does not rank UK universities in a scientific way.

D) It indicates their ineffective use of government resources.

28. The "policy interventions" (Line 1, Para. 4) refers to _____.

A) fair distribution of funding for universities and research institutions

B) compulsory cooperation between universities and industries

C) concentration of resources in a limited number of universities

D) government aid to non-research-oriented universities

29. What does the author suggest research-led universities do?

A) Generously share their facilities with those short of funds.

B) Fully utilise their research to benefit all sectors of society.

C) Spread their influence among top research institutions.

D) Publicise their research to win international recognition.

30. How can the university sector play a key role in the UK's economic growth?

A) By increasing the efficiency of technology transfer agencies.

B) By establishing more regional technology transfer offices.

C) By promoting technology transfer and graduate school education.

D) By asking the government to invest in technology transfer research.

答案详解

Passage 1

选项词性分类

名　词	consensus(共同意见,一致看法,共识);extract(节录;提炼物);fraction(少量,一点;分数);magnitude(巨大,庞大;重要性);resources(资源;财力);threats(威胁,可能带来危险的人或事)
动　词	complete(完成,结束);dominate(支配,控制);examined(检查,审查);extract(取出;提炼);overworked(过度工作,过分劳累);related(把……联系起来;相关联);resources(向……提供资源)
形容词	ambiguous(模棱两可的,不明确的);complete(已完成的;完整的);evident(明显的,明白的);overworked(操劳过度的;使用过度的);related(有关系的,相关的);scant(不足的,缺乏的)
副　词	necessarily(一定;必然);routinely(惯常地,例行地)

答案解析

1. F) 动词辨析题。分析句子结构可知,空格所在句的主干是 The research _____ executive remuneration…and found…,因此空格处应填入动词的过去式与 found 并列,作句子的谓语。此处句意为:该研究_____2003 年至 2013 年 10 年间 30 个富时 100 指数成分股公司首席执行官们的薪酬情况,发现……。备选项中,examined"检查,审查"符合题意,故本题正确答案为 F)。

2. N) 形容词辨析题。分析句子结构可知,空格位于系动词 was 和名词 correlation 之间,因此应填入冠词或形容词修饰 correlation。此处句意为:该研究……发现,公司对股东强调的关键业绩指标,与用来激励和回报高管的衡量标准之间有_____关联。根据文章首段可知,决定高管薪酬的主要因素仍是一些简单化的业绩衡量尺度,这些尺度与公司价值的长期推动因素关系不大,因此空格处应填入与首段中的 little 一样表示"关系不大"的形容词。结合备选项可知,scant"不足的,缺乏的"符合题意,故本题正确答案为 N)。

3. I) 名词辨析题。空格位于定冠词 the 和介词 of 之间,因此应填入名词。此处句意为:围绕高

管薪酬的讨论主要关注奖金的_____。由此推断，空格处应填入表示“奖金金额”的名词，结合备选项可知，magnitude“巨大，庞大”符合题意，故本题正确答案为 I）。

4. **H**）名词辨析题。空格位于 A large 和介词 of 之间，因此空格处应填入名词单数。此处句意为：_____首席执行官的薪酬似乎与周期价值创造没有关联。空格前一句指出，无论采取哪些具体的业绩衡量尺度，首席执行官们的薪酬与公司业绩的关联度都很低，因此空格所在句是对这句话的进一步解释，故 A large _____ of 应当是强调数量之多。结合备选项可知，fraction“少量，一点”符合题意，A large fraction of 意为“大量的”，故本题正确答案为 H）。

5. **D**）动词辨析题。空格位于不定式符号 to 和名词短语 the criteria 之间，因此应填入动词原形。此处句意为：像……这样相对简单化的业绩衡量尺度仍然_____衡量高管们任期业绩的尺度。空格后一句指出，很少有哪家公司采用将业绩与资金成本_____的基于价值的衡量尺度。结合备选项可知，dominate“支配，控制”符合题意，本题正确答案为 D）。

6. **L**）动词辨析题。分析句子结构可知，空格位于 that 引导的定语从句中，该定语从句缺少谓语动词，再结合空格所在句的时态可知，空格处应填入动词的过去式。此处句意为：很少有哪家公司采用了将业绩与资金成本_____的基于价值的衡量尺度。结合本段首句可知，目前大部分公司采用的都是相对简单化的业绩衡量尺度，将业绩与资金成本关联的衡量尺度很少使用。结合备选项可知，空格处应填入 related“把……联系起来”，本题正确答案为 L）。

7. **J**）副词辨析题。分析句子结构可知，空格位于 that 引导的定语从句中，该定语从句主谓宾齐全，空格位于 does not 和 enhance 之间，因此空格处应填入副词修饰 enhance。此处句意为：每股盈利可通过并购活动得到提升，此类操作不_____提高利润。结合句意和备选项可知，necessarily“一定”符合题意，not necessarily 意为“未必，不一定”，故本题正确答案为 J）。

8. **O**）名词辨析题。分析句子结构可知，_____ to organizational culture 与前面的三个名词短语并列，是对 the dangers of over-reliance on…的举例说明，因此空格处应填入动名词或名词。结合前面的三个名列名词可知，空格处填入的名词应具有否定含义，备选项中的 threats“威胁，可能带来危险的人或事”符合题意，故本题正确答案为 O）。

9. **E**）形容词辨析题。分析句子结构可知，空格所在句为 there be 结构，空格位于系动词 are 和名词 flaws 之间，因此较有可能填入形容词修饰 flaws。由上一段末句可知，目前的薪资衡量尺度存在很多问题，空格所在句应是接着上段继续说明当前薪酬政策存在缺陷，备选项中的 evident“明显的，明白的”符合题意，因此本题正确答案为 E）。

10. **B**）形容词辨析题。空格前为 the journey is far from，因此空格处应填形容词。此处句意为：尽管我们的报告强调薪酬实践已有所改进，但这段旅程还远远没有_____。结合句意可知，此处是强调薪酬实践还有很长的一段路要走，备选项中，complete“已完成的”符合题意，故本题正确答案为 B）。

Passage 2

文章大意

电视或电影中植入的食品广告往往会影响孩子们的饮食选择，本文就讨论了这一问题。文章首先介绍哪些因素会影响孩子的饮食选择，并指出因为不健康的饮食，许多孩子出现了肥胖问题；接着指出，电视广告和电影中宣传的食品大部分都是不健康食品；最后，文章指出这些食品频繁出现在电视广告或电影中给孩子带来的影响以及我们该如何应对这一问题。

答案解析

11.【定位】由 16 major food and restaurant companies 定位到 C)段第二句。
【解析】**C)**。细节推断题。由定位句可知,这些食品和餐饮公司宣布,如果这些食品达不到自己公司的营养标准,就不会将这些食品推销给 12 岁以下的孩子。因此,答案为 C)。

12.【定位】由 the Henry J. Kaiser Family Foundation 和 half of all ad time on children's shows 定位至 G)段。
【解析】**G)**。同义转述题。由定位段最后一句可知,儿童类节目中,一半时间的广告都是关于食物的,因此答案为 G)。

13.【定位】由 Dr. Wootan 和 a major cause of childhood obesity 定位到 F)段第一句和第三句。
【解析】**F)**。同义转述题。由 F)段第三句可知,营销垃圾食品是造成孩子肥胖的一个主要原因。题干中的 cause 是对定位句中 contributor 的同义转述。因此,答案为 F)。

14.【定位】由 Researchers found 和 watching more TV 定位到 I)段末句。
【解析】**I)**。细节推断题。由定位句可知,每多看一个小时的电视节目,孩子们就额外摄入 167 卡路里热量。由此可知,孩子们看电视越多,摄入的热量就越多。因此,答案为 I)。

15.【定位】由 Margo G. Wootan 和 protective measures 定位到 E)段第二句。
【解析】**E)**。细节推断题。由定位句可知,Margo G. Wootan 指出,尽管这个产业有自我约束体系,但是大多数食品公司并没有针对孩子的保护措施。因此,答案为 E)。

16.【定位】由 A lot of movies 和 featured brand appearances 定位到 K)段首句。
【解析】**K)**。同义转述题。由定位句可知,许多给孩子和青少年看的电影中都会出现一些品牌。K)段第二句接着提到,尽管可口可乐和百事承诺不在儿童节目里宣传他们的产品,但这些产品仍经常出现在电影中。因此,答案为 K)。

17.【定位】由 The movie producers 和 brand placements 定位到 O)段末句。
【解析】**O)**。细节辨认题。由定位句可知,现在是时候让那些电影制片人知道品牌植入有害美国儿童的健康并会使他们的体重增加了。因此,答案为 O)。

18.【定位】由 Nutritionists, on TV 和 occasionally 定位到 H)段首句。
【解析】**H)**。细节推断题。由定位句可知,营养学家认为,对于大多数在电视广告中出现的食品,孩子们应该有节制地偶尔食用或少量食用。因此,答案为 H)。

19.【定位】由 marketing, ignore 和 movie product placement 定位到 N)段首句。
【解析】**N)**。同义转述题。由定位句可知,电影中的产品植入就相当于潜意识广告,但这一点往往会被忽视。题干中的 has the same effect as 是对定位句中 is equal to 的同义转述。因此,答案为 N)。

20.【定位】由 The issue 和 important 定位到 B)段第二句。
【解析】**B)**。同义转述题。由定位句可知,正因为全国儿童肥胖率上升,这个问题变得尤其重要。因此,答案为 B)。

Passage 3

答案解析

21.【定位】由 excess body heat be used for 定位到第二段首句。
【解析】**D)**。细节辨认题。定位句提到,利用多余的体热为建筑物供暖,并以"美利坚购物中心"为例说明这一理念早就存在。因此,D)为正确答案。

22.【定位】由 the way of using body heat 和 new 定位到第二段第二句。
【解析】**B**)。细节辨认题。由定位句可知,斯德哥尔摩使用体热的创新之处在于把多余体热从一座建筑物转移到另一座建筑物。因此,B)为正确答案。

23.【定位】由"It pays for itself very quickly"定位到第三段倒数第二句。
【解析】**A**)。语义理解题。第三段倒数第一、二句提到,对一栋预计成本将达到几亿克朗的大楼而言,这笔花费并不算多;再结合该段第三、四句可知,这种系统很划算,从长远来看,它将为这栋办公楼节省多达 20% 的能源成本。因此,A)为正确答案。

24.【定位】由 Ulla Hamilton 和 keen on using green energy 定位到最后一段第二至四句。
【解析】**D**)。细节辨认题。由定位句可知,Ulla Hamilton 认为,瑞典人如此热衷于绿色能源是与他们的生活方式分不开的。在斯德哥尔摩,多数家庭中都有人生活在农村,这使他们和大自然有一种特殊的关系,也正因为如此,可持续性成为瑞典文化的重要组成部分。因此,D)为正确答案。

25.【定位】由题干定位至全文。
【解析】**A**)。主旨大意题。纵观全文,作者主要介绍了体热作为一种绿色能源在瑞典是如何被应用的。因此,A)为正确答案。

参考译文

早上七点半,在斯德哥尔摩市中心,一大群瑞典人正冒着严寒涌入中心车站赶上班的火车。每天,250 000 名通勤者挤满了斯堪的纳维亚最繁忙的交通中心。这些通勤者身体所散发出的热量,加上拥挤的商店和饭店,使得车站里暖烘烘的。这股热潮通常会在早晨上班高峰结束时退去。然而,工程师们想出了一个办法来利用这些热量并将其转移到这个街区那头一栋刚刚整修过的办公大楼。这些汗流浃背的瑞典人已经变成了绿色能源的一个来源。Karl Sundholm 是斯德哥尔摩一家房地产公司 Jernhusen 的项目经理,同时也是这一系统的创建者之一。他指出:"体热价格低廉,而且可以再生。"

(21)利用多余的体热为建筑物供暖并非一种新的理念——当明尼苏达州可怕的冬天到来的时候,位于明尼阿波利斯市的"美利坚购物中心"通过回收利用购物者身体所散发出的热量来调节这个巨大购物中心的温度。(22)但斯德哥尔摩通过成功地将多余体热从一座建筑物转移到另一座建筑物,进一步拓展了这一理念。Sundholm 解释说:"这并非新技术,但使用方式是新颖的。这项技术用的只是管道、水和抽水泵,但之前我们从来没有听说过别人以这样一种方式来使用这一技术。"

这一系统是这样运作的:用车站通风系统吸收通勤者所散发出的热量来加热地下储水池中的水,然后通过管道将这些加热过的水抽到 100 码之外的一栋 13 层的办公大楼里,并使其融入主供热系统。这一系统不仅环保,而且划算。从长远来看,这家公司预计每年将会为这栋办公楼节省多达 20% 的能源成本。Sundholm 说,建造这一新供热系统(包括安装必需的水泵和铺设地下管道在内)仅花费这家公司约 30 000 美元。(23)他补充道:"成本很快就能收回。对一栋预计建设成本将达到几亿克朗的大楼而言,这笔花费并不算多,特别是它所需热量的 15% 到 30% 将从车站获得。"

寒冷的冬天加上较高的能源费用使得有生态意识的瑞典人长期以来一直以一种创新的方式为家庭供暖。(24)斯德哥尔摩副市长 Ulla Hamilton 致力于首都环境保护、废物处理和回收利用方案的设计。他将其归功于瑞典人的生活方式。他说:"在斯德哥尔摩,多数家庭中都有人生活在农村,因此斯德哥尔摩人与自然有一种特殊的关系。正因为如此,可持续性已经成为我们文化当中很重要的一部分。"

Passage 4

答案解析

26.【定位】由 UK universities 和 commercialisation 定位到第三段第二句。

【解析】**D)**。细节辨认题。作者从第三段开始就表明自己不同的立场，即我们需要反驳那些称大学缺乏商业化能力的抱怨；之后作者通过研究数据证明自己的观点，指出英国大学的起点虽然相对较低，但是其在商业化活动中的许多指标都居于前列。因此，答案选 D)。

27.【定位】由 national data 定位到第四段第三句。

【解析】**A)**。细节辨认题。定位句提到，全国性的数据掩盖了各个大学表现之间的巨大差异，也就是说，没有反映出各个大学之间的不同；第四句又具体地描述了有哪些不同：一大批大学已经掉队，只有少数大学表现十分突出，剩下的大学在追赶领先者。因此，答案为 A)。

28.【定位】由 policy interventions 定位到第四段第一句。

【解析】**C)**。推理判断题。题干中的 policy interventions 出现在第四段第一句，第四段大意是政府干预对英国大学的表现有积极作用，但导致了各个大学实力不均衡的现象；第五段第二句指出，在英国，科研是十分集中的，不到 25% 的大学获得了 75% 的研究基金；第五段末句总结：很明显，科研和商业化活动上的集中导致了大学之间的差异。由此推断，政府的政策指“对一定数量的大学进行资源的集中投入”，故答案为 C)。

29.【定位】由 research-led universities 定位到第六段的第一、二句。

【解析】**B)**。推理判断题。定位句指出：以研究为主导的大学的核心目标必定是将其研究成果的作用最大化。这些大学应该要产生最大范围的社会、经济和环境效益。由此推断，作者建议以研究为主导的大学要“充分利用研究成果以造福社会各个行业”，故答案为 B)。

30.【定位】由 play a key role in the UK's economic growth 定位到最后一段。

【解析】**C)**。细节辨认题。定位段提到，如果想要英国大学在本国经济增长中发挥作用，就要满足两个条件：“地区间技术转让部门的协调更加顺畅”，同时，“投入资金进行研究生院的建设，使其规模更大且更好地发挥作用”，也就是技术转让和研究生教育这两个方面。因此，答案为 C)。

参考译文

因被察觉到在将新知识转化为新产品和服务方面疲软，英国大学界一直以来都饱受批评。

最近，英国国家干细胞网络发出警示，如果没有充足的资金和立法保障，英国可能会失去在世界干细胞研究中的领军地位。我们必须严肃对待这个问题，因为大学在国家创新体制中至关重要。

然而，我们确实需要反驳那些称大学界在将观念带入市场方面做得不够这种未经思考而发出的抱怨。(26)关于澳大利亚、加拿大、美国和英国的大学以及研究机构表现情况的最新比较数据显示，英国的起点虽然相对较低，但是其在商业化活动中的许多指标都居于前列。

从英国全国范围来看，过去十年的政策干预为英国大学表现的转变提供了帮助。证据表明，英国大学的地位较前些年明显提高，并仍在不断提升。(27)但全国性的数据遮盖了各个大学表现之间的巨大差异。有证据显示，一大批大学已经掉队，只有少数大学表现十分突出，剩下的大学在追赶领先者。

这种分布不均的现象并非英国特有，其他经济体也存在同样的现象。(28)在英国，科研是十分集中的：不到 25% 的大学获得了 75% 的研究基金。上述这些大学同样也是博士学位获得者

辈出，科研方面被引用、专利和授权收益最多的机构。政策导致长期资源集中，同时也造就了一批独特的、以研究为主导的、活跃于商界的大学。(28)这点看起来很明显：科研和商业化活动上的集中导致了大学之间的差异。

(29)以研究为主导的大学的核心目标必定是将其研究成果的作用最大化。这些大学应该要产生最大范围的社会、经济和环境效益。作为对规模投资的回报，它们必须分享它们的专业知识，以在大学领域树立更大的信心。

下一股从大学里涌出的商业化研究潮流将会对英国经济的复兴起到部分作用。英国有36所大学在积极从事高端研究培训和商业化活动。

(30)如果地区间技术转让部门的协调更加顺畅，同时投入资金进行研究生院的建设，使其规模更大且更好地发挥作用，那么大学能够也应该在下一轮增长中为英国地位的巩固发挥关键作用。

Model Test 2

Passage 1

题源：*TIME*　　题材：科普知识　　建议用时：7分钟

If you're one of those people who tends to put on weight around your middle, what doctors call an "apple shape"—what the rest of us call a beer belly—you've probably been told that you're at higher risk of heart disease. But one large new review study suggests you shouldn't be too __1__ after all.

It turns out that the apple-shaped among us are not at any higher risk of heart trouble as people with pear shapes or any other kind of fat __2__. In the latest study, researchers at the Emerging Risk Factors Collaboration in the UK reviewed records of more than 220 000 participants in 58 different trials that followed __3__ for more than 10 years for heart-related events. They found that body shape, or fat distribution, did not seem to affect heart disease risk.

In fact, the researchers write in the journal *Lancet*, various measures of obesity, including body mass index (or BMI, a combined measure of height and weight), waist *circumference* (周长) and waist-to-hip ratio, all had about the same __4__ value in identifying increased risk of a heart attack. What's more, __5__ to the forecasting power of known risk factors such as high cholesterol, high blood pressure and a history of diabetes, the obesity measures added very little to the __6__ of risk assessment.

Previous studies had focused not just on overweight, but on the type and __7__ of fat deposits as a red flag for heart disease. The thinking was that even without blood tests for cholesterol or blood pressure, body shape alone could alert doctors and patients to the fact that patients might be at higher risk of heart problems. One headline-grabbing survey reported a three-fold __8__ risk in heart disease among those with abdominal fat—folks with apple-shaped bodies—and speculated that *visceral* (内脏的) fat, which tends to __9__ around the middle, is particularly hazardous for the heart, since it nestles deep within organs and can pump out hormones that __10__ *insulin* (胰岛素) sensitivity and promote diabetes.

A）accumulate	F）decreased	K）elevating
B）accuracy	G）discouraged	L）increased
C）alter	H）distinguished	M）location
D）compared	I）distribution	N）predictive
E）conflicted	J）diversion	O）volunteers

Passage 2

题源： *The Economist*　　**题材：** 商业经济　　**建议用时：** 15 分钟

Boeing's Labour Problems—Moving Factories to Flee Unions

A）With corporate offices in Chicago, Boeing employs more than 165 000 people across the United States and in 70 countries. The company claims this represents one of the most diverse, talented and innovative workforces anywhere, and, in these workforces, more than 123 000 employees hold college degrees—including nearly 32 000 advanced degrees—in virtually every business and technical field from approximately 2 700 colleges and universities worldwide. The enterprise also says it *leverages*（充分利用）the talents of hundreds of thousands more skilled people working for Boeing suppliers worldwide. Yet with this talented and high-quality labour force, labour-capital issues often occur.

B）Boeing decided a few years ago to build its 787 Dreamliner in South Carolina, the *Wall Street Journal*（WSJ）*opines*（认为）, because it was afraid its union in Washington was too strong. South Carolina is a "right-to-work" state: Title 41, Chapter 7 of the state code makes it illegal for companies and unions to sign a contract in which anyone who works at the company has to join the union. That makes it extremely difficult to organise effective unions, and Boeing hoped it wouldn't have as many strikes at a plant in South Carolina as it had experienced at its plants in Seattle in recent years. The unions sued over the move, and the National Labor Relations Board has now awarded them a preliminary order blocking the factory from operating until an investigation into whether the company's shift of production to a union-hostile state in order to avoid union activity constituted anti-union *animus*（敌意）.

C）To lay the groundwork here, it's important to understand what "right-to-work" means. It doesn't mean "the government stays out of the labour negotiations business". Right-to-work laws specifically ban employers and unions from signing contracts stipulating that anyone who works at the company has to join the union. That's a basic step that unions always try to negotiate for, since without it they find it very hard to establish themselves as the negotiating partner with management.

D）Anyway, here's the sentence I found most amusing in the WSJ's editorial: "Boeing management did what it judged to be best for its shareholders and customers and looked elsewhere." Boeing's motivation for shifting production to an anti-union state was not to benefit customers. If Boeing felt it could raise prices for the airplanes it builds without losing market share, it would do so in a second, regardless of whether that was "best for its customers". Companies try to lower operating costs in order to raise profits or cut prices and win market share, not out of a selfless desire to benefit customers.

E）But the more important flaw here is that the reason why Boeing might have judged its decision to

move production to South Carolina "best for its shareholders" was that it didn't think it violated labour law to flee your union. If it did violate labour law, then Boeing made a bad decision and delivered negative value to its shareholders. To put things another way, if America had labour laws that were uniform from state to state like any other normal economic power, rather than a race-to-the-bottom system where states are pressured to weaken labour laws in order to *entice* (诱惑) employers, then there would have been no reason for Boeing to move production. There is simply no moral content to Boeing's decision to move production to South Carolina. Boeing doesn't get brownie points for engaging in regulatory *arbitrage* (套利) and stiffing its unions just because it judged that move to be best for shareholders. Congratulating Boeing for trying to deliver shareholder value is like congratulating it for building and selling airplanes. That's simply what the company does. Boeing's decision was a judgment about how to play, given its evaluation of the rules of the game. The question of whether companies should be allowed to flee their unions is a question about what the rules of the game ought to be, in order to deliver value to the economy and to society.

F) So, should companies be barred from moving production to a right-to-work state to flee their unions? Niklas Blanchard thinks not. He calls it "protectionism". "While I don't *begrudge* (不乐意给) the right for unions to form and attempt to bargain, I also don't begrudge the right of management the say, 'FU, we're going somewhere else'. In an ideal world, they would do this free of government playing for either side. But in this case, we have the government contemplating restricting capital flows between states! The United States, as understood properly, is the largest free trade area in the world. That has been a huge comparative advantage for the US historically, and arguably the reason that we are at the top of the world economic pyramid today. Restricting the flow of capital makes us poorer by reducing productive employment, and increasing prices. It's a very poor precedent to set."

G) I think this is a confusing analogy. Mr Blanchard may be right that, given that labour and other business laws differ from state to state, the United States might best be understood as the world's largest free trade area, rather than a single country. But does anyone think that the United States would be a dramatically less prosperous country if it had uniform labour and business law throughout its territory? Have right-to-work laws in 22 states made such an immense contribution to American prosperity that without them America would not be the world's largest and wealthiest economy? Really? Seriously? Would American technological ingenuity have been crippled if the whole country had to follow the labour laws that obtain in Silicon Valley?

H) I don't think so. I think if there were no right-to-work states, American GDP wouldn't be significantly different than it is today. And if America did have uniform labour laws, then Boeing's decision as to whether to produce in Puget Sound or South Carolina would have nothing whatsoever to do with unions. If labour laws in South Carolina and Washington were equivalent, the only thing the workers in Puget Sound would have to worry about is whether their demands would lead the company to lose market share or to move production overseas. The first might be a real worry; the latter is a marginal issue for Boeing workers because the company is a defence industry-supported national champion firm.

I) Now maybe unionised Boeing workers should be more worried about hurting the company's market share as it competes with the European Aeronautic Defence and Space Company (EADS) and with

regional-jet builders like Embraer and Bombardier. It certainly sounds like the company has a strike problem. But EADS's labour force is hardly non-unionised. If Boeing is having more trouble with its unions than its competitors are, it's possible that the fault lies with the company, rather than with the unions. What's happening here is that anti-labour laws in certain states allow companies to shift investment to those states in order to get around their unions. And efforts by unions to block that *manoeuvre* (策略) can then be condemned as "restrictions on capital flow". The issue isn't freedom of capital. The issue is whether employers can use a threat to move production to a union-hostile state as a negotiating tactic in collective bargaining.

11. The author questions whether right-to-work laws will make a great contribution to American prosperity.
12. Anti-labour laws in some states make it possible for companies to shift investment to those states in order to get around their unions.
13. According to the *Wall Street Journal*, Boeing intended to build its 787 Dreamliner in South Carolina because it wanted to avoid the strong union in Washington.
14. Boeing judged its decision "best for its shareholders" because it didn't think it was against labour law to flee the union.
15. Companies are not allowed to sign contracts with unions that force all employees to join the union.
16. Labour-capital issues often occur in Boeing, though Boeing has the talented labour force.
17. The author thinks that American GDP wouldn't be significantly different if there were no right-to-work states.
18. Boeing's motivation for shifting production is to occupy a bigger market share and raise profits.
19. Niklas Blanchard holds the view that restricting the flow of capital is a very poor precedent to set.
20. Unlike any other normal economic power, the United States has a race-to-the-bottom system.

Passage 3

题源：*TIME*　　题材：社会生活　　建议用时：8 分钟

Most runners, whether they're training for a marathon or simply out to get some exercise, will stretch before they take off. It's a ritual that verges on the sacred, strongly connected to the intuitive sense that priming the muscles is a good way to avoid injuring them during the run to come.

But researchers at George Washington University and the USA Track and Field Association (USATF) report that stretching before a run does not appear to reduce injury at all. In fact, among the more than 2 700 runners in the study, ranging from recreational runners to competitive marathoners, all of whom ran at least 10 miles a week, the scientists found similar injury rates—of about 16%—over a three-month period among those who stretched before running and those who did not.

The idea behind stretching is to lengthen the muscle fibers to increase their function and hopefully enhance performance, helping runners maintain a faster pace or run for a longer period of time. A study of British recruits in the military found that a regular stretching routine before training reduced injury rates from 6% to 1%. But other recent studies among gymnasts, football players and wrestlers have questioned the practice, suggesting that stretching does not impact performance at all.

That's why Dr. Daniel Pereles, a runner himself, decided to look specifically at the role that

stretching might play in running injuries. Most studies on the subject, including the British trial in the military, involved stretching routines that included much more than stretching running muscles; they also incorporated *calisthenics* (健美操) and other exercises. Pereles wanted to know specifically whether stretching leg muscles—the *quadriceps* (四头肌), *hamstrings* (腘绳肌腱) and calf muscles—would have an impact on injuries.

Through the USATF, Pereles was able to recruit enough runners of various levels to get an answer to his question. About half of the 2 729 volunteers were told to stretch their quads, hams and calf muscles for three to five minutes before running for however long they usually exercised. The remaining half were told to run without stretching.

While he found that stretching did not have any effect on injury rates among the two groups, he did find several factors that did seem to influence whether the runners hurt themselves. Heavier runners, as well as those who had recently suffered an injury, were more likely to harm themselves. Interestingly, Pereles also found that those who switched from a stretch to non-stretch or non-stretch to stretch routine for the study were more likely to get injured. Stretchers who were told not to stretch during the three-month study increased their risk of injury by 40%, while those who switched from not stretching to stretching increased their risk by 22%.

21. What is commonly done by most runners before their running?
    A) Stretching their body.
    B) Strengthening their muscles.
    C) Doing lots of exercise.
    D) Running a long distance.
22. According to the report from USATF, runners who stretch before running _____.
    A) have higher injury rates than those who don't
    B) have lower injury rates than those who don't
    C) share similar injury rates with those who don't
    D) tend to reduce injuries after 3 months
23. What can be inferred from the third paragraph?
    A) It is certain that stretching before running is helpful.
    B) It is regular stretching before running that is effective.
    C) The result of studies among wrestlers corresponded with that of the study of British recruits.
    D) The outcome of the study of British recruits is contrary to that of other recent studies.
24. The specific aim of Dr. Daniel Pereles' research is to find _____.
    A) the impact of stretching leg muscles on injuries
    B) the role of the British trial in the military
    C) the role that calf muscles play in running
    D) the impact of exercising hamstrings on injuries
25. What is the interesting point of Pereles' findings?
    A) Injuries possibly occur when people change their stretching habits.
    B) Stretching does not have any impact on injury rates.
    C) Heavier runners are most likely to get injured.
    D) Several factors contribute to injuries.

Passage 4

题源：*TIME*　　题材：文化教育　　建议用时：8 分钟

In junior high school, one of my classmates had a TV addiction—back before it was normal. This boy—we'll call him Ethan—was an *encyclopedia*（百科全书）of meaningless content, from "The A-Team" to "Who's the Boss?". Then one day Ethan's mother made him a bold offer. If he could go a full month without watching any TV, she would give him $200. None of us thought he could do it. But Ethan quit TV, just like that. His friends offered to let him cheat at their houses on Friday nights. Ethan said no. One month later, Ethan's mom paid him $200. He went out and bought a TV, the biggest one he could find.

Since there have been children, there have been adults trying to get them to cooperate. The Bible repeatedly commands children to heed their parents and proposes that disobedient children be stoned to death or at least have their eyes picked out by birds. Over the centuries, the stick has lost favor, in most cases, to the carrot. Today the tiny *bribes*（贿赂）—a sticker for using the toilet or a cookie for sitting still in church—start before kids can speak in full sentences.

In recent years, hundreds of schools have made these transactions more businesslike, experimenting with paying kids with cold, hard cash for showing up or getting good grades. I have not met a child who does not admire this trend. But it makes adults profoundly uncomfortable. Teachers complain that we are rewarding kids for doing what they should be doing of their own will. Psychologists warn that money can actually make kids perform worse by cheapening the act of learning. Parents predict widespread slacking after the incentives go away. The debate has become a battle for the larger war over why our kids are not learning at the rate they should be despite decades of reforms and budget increases.

But all this time, there has been only one real question, particularly in America's lowest-performing schools: Does it work? To find out, a Harvard economist did something education researchers almost never do: He ran a randomized experiment in hundreds of classrooms in multiple cities. He used mostly private money to pay 18 000 kids a total of $6.3 million and brought in a team of researchers to help him analyze the effects. The result is that money is not enough. But for some kids, it may be part of the solution. In the end, we all want our children to grow into self-motivated adults. The question is, how do we help them get there?

26. What does the author suggest by saying Ethan was "an encyclopedia"?

A）Ethan was knowledgeable.

B）Ethan knew many pointless things from TV.

C）Ethan was intelligent.

D）Like an encyclopedia, Ethan knew everything.

27. What can we infer from the second paragraph?

A）The Bible still plays an important part in education.

B）The Bible encourages children to be disobedient.

C）Rewarding works in educating children.

D）Parents prefer bribing their children in education.

28. What does the word "slacking"（Line 6, Para. 3）mean?

A）Being lazy in study.

B）Cheating.

C）Making an effort in study.

D）Complaining.

29. What's the result of the Harvard economist's experiment?

A) Children don't care about money.

B) A lot of researchers have done similar things before.

C) Offering money is not sufficient.

D) Offering money is the most effective way.

30. What is the best title for this passage?

A) Does Bribing Children Work in Education?　C) Problems in Education Should be Settled

B) Children Prefer Money to Learning　D) Parents Are Wrong in Teaching Children

答案详解

Passage 1

选项词性分类

名　词	accuracy(准确;准确性);distribution(分发;分布);diversion(转向,转移);location(地点,位置);volunteers(志愿者;自告奋勇者)
动　词	accumulate(积累;堆积);alter(变化,改变);compared(比较,对比);conflicted(矛盾,冲突);decreased(变小,减少);discouraged(劝阻;使灰心);distinguished(区分;使有特色);elevating(提升;抬高);increased(增加,提高)
形容词	conflicted(因心理冲突而不知所措的);discouraged(灰心的,丧气的);distinguished(杰出的;气度不凡的);elevating(增长知识的,提升思想道德水平的);increased(增加的;增强的);predictive(预测的)

答案解析

1. G) 形容词辨析题。根据句子结构和空格前的 shouldn't be too 可知,空格处应填一个形容词。本段第一句指出,"苹果体形"的人被认为患心脏病的风险更高;空格所在句的句首用 But 表示转折,表明"苹果体形"的人不必太失望或沮丧。因此,discouraged"灰心的,丧气的"符合题意。

2. I) 名词辨析题。根据句子结构,of fat _____应作 kind 的后置定语,因此空格处应填一个名词。根据句意,本句比较了"苹果体形"的人和其他体形的人患心脏病的风险,指出"苹果体形"的人患心脏病的概率并不比具有"鸭梨体形"的人或具有其他脂肪_____类型的人要高。所谓"苹果体形"或"鸭梨体形",都是指脂肪分布的类型,故 distribution"分布"符合题意。

3. O) 名词辨析题。根据句子结构,空格所填词应作动词 followed 的宾语,因此此处应填入一个名词。根据句意,本句前半部分介绍研究者检查了记录,后半句介绍这些记录来自 58 个不同的试验,这些试验在十多年的时间里追踪_____心脏方面的疾病。结合备选名词,可知 volunteers"志愿者"符合题意。

4. N) 形容词辨析题。空格前为形容词 same,空格后是名词 value,故空格处较有可能填入形容词,与 same 一起修饰 value。本段提到了身高体重指数、腰围等不同的肥胖衡量标准对识别心脏病风险的作用。根据常识,它们可以预测心脏病的发生率,故 predictive"预测的"符合题意。

5. D）固定搭配题。根据句意，空格所在句将肥胖衡量标准与其他已知健康风险因素，如高胆固醇、高血压等相比较，compared 与空格后的 to 构成固定搭配，表示“比较”，符合题意。

6. B）名词辨析题。分析句子结构可知，of risk assessment 应作空格所填词的后置定语，因此空格处应填一个名词。此处句意为：和高胆固醇、高血压和糖尿病史相比，肥胖衡量标准并不能提高心脏病风险评估的_____。结合备选名词可知，accuracy“准确性”符合题意。

7. M）名词辨析题。根据句子结构，空格所填词应与 type 并列，并能被后面的 of fat deposits 修饰，因此空格处应填一个名词。根据句意，先前的研究不仅关注肥胖问题，而且关注脂肪沉积的类型和_____，以此作为心脏病的警示信号。结合备选名词可知，location“地点，位置”符合题意。

8. L）形容词辨析题。分析句子结构可知，空格处较有可能填一个形容词修饰 risk。结合上一句可知，本句要表达的意思为：腹部堆积脂肪的人患心脏病的风险增加三倍。因此，备选形容词中，increased“增加的”符合题意。

9. A）动词辨析题。空格前为不定式符号 to，后为介词 around，故空格处应填动词原形，且能与 around 搭配。空格所在分句是由 which 引导的非限制性定语从句，对前面的 visceral fat 进行解释说明，指出其具体位置，此处句意为：内脏脂肪往往在腹部_____。结合备选动词可知，accumulate“堆积”符合题意。

10. C）动词辨析题。分析句子结构可知，_____ insulin sensitivity 应与 promote diabetes 并列，因此空格处应填动词原形。空格所在分句是由 that 引导的定语从句，对其前的 hormones 进行解释说明，且空格所填动词应能与其后的 sensitivity 构成动宾关系，故备选动词中，只有 alter“改变”符合题意。

Passage 2

文章大意

文章主要评述飞机制造业巨头——波音公司的劳资矛盾及与此相关的一些经济制度与政策问题。文章首先介绍了波音公司欲将生产地搬至工会力量薄弱的南卡罗莱纳州及由此引发的劳资纠纷；接着分析了波音公司此举的真实目的——降低成本；然后指出波音公司能够这样做是利用了美国的经济制度环境——各州经济法规不一样，这使波音公司有机会逃避工会力量的制约；最后，文章指出在目前情况下，波音公司的劳资双方应该采取什么措施。

答案解析

11. 【定位】由 right-to-work laws 和 American prosperity 定位到 G）段第四句。
【解析】**G）**。细节归纳题。由定位句可知，作者提出疑问，在美国 22 个州中践行工作权利法规到底能不能对美国的繁荣作出如此巨大的贡献，以至于如果没有它们，美国就不会成为世界上最大、最富有的国家？因此，答案为 G）。

12. 【定位】由 Anti-labour laws 和 shift investment 定位到 I）段倒数第四句。
【解析】**I）**。细节推断题。由定位句可知，某些州反劳工的法规允许一些公司将投资转移至这些州，从而绕开工会。因此，答案为 I）。

13. 【定位】由 the *Wall Street Journal* 和 787 Dreamliner 定位到 B）段第一句。
【解析】**B）**。同义转述题。由定位句可知，《华尔街日报》认为，几年前波音公司决定在南卡罗莱纳州生产 787 Dreamliner 是因为它害怕华盛顿的工会力量太强大。因此，B）为正确答案。

14.【定位】由 judged 和“best for its shareholders”定位到 E)段第一句。
【解析】**E)**。同义转述题。由定位句可知,波音公司认为它将生产地转移到南卡罗莱纳州的决定“对股东最有利”,而它作出这个判断的原因在于它认为逃离工会并不违反劳动法。因此,答案为 E)。

15.【定位】由 sign contracts 和 join the union 定位到 C)段第三句。
【解析】**C)**。细节推断题。由定位句可知,工作权利法规禁止雇主和工会签订任何强制公司员工加入工会的合同。因此,C)为正确答案。

16.【定位】由 Labour-capital issues often occur 定位到 A)段末句。
【解析】**A)**。同义转述题。由定位句可知,波音公司虽然有一批有才能、高质量的员工,但经常出现劳资问题。因此,A)为正确答案。

17.【定位】由 American GDP 和 significantly different 定位到 H)段第二句。
【解析】**H)**。同义转述题。由定位句可知,作者认为,如果不存在保障工作权利的州,美国的国内生产总值也不会与今天有显著不同。因此,H)为正确答案。

18.【定位】由 motivation for shifting production 定位到 D)段第二句。
【解析】**D)**。细节推断题。由 D)段第二至四句可知,如果波音公司觉得在不丢失市场份额的前提下可以提高飞机价格,那它会毫不迟疑地去做,并不会顾及这是否对顾客最有利,公司降低运营成本的目的是提高利润或降低价格,并赢得市场份额,并非出于一种无私的让利于顾客的愿望。因此,答案为 D)。

19.【定位】由 restricting the flow of capital 和 poor precedent 定位到 F)段最后两句。
【解析】**F)**。细节推断题。由定位句可知,通过减少生产性就业和提高价格来限制资本流动会使我们更贫穷,这将是一个非常糟糕的先例。因此,答案为 F)。

20.【定位】由 normal economic power 定位到 E)段第三句。
【解析】**E)**。细节推断题。由定位句可知,如果像其他任何正常经济体一样,美国各州之间拥有统一的劳动法,而不是一种向下竞争的体系——在这种体系下,各州被迫削弱劳动法来吸引投资者——那波音公司就没有理由迁移工厂了。因此,E)为正确答案。

Passage 3

答案解析

21.【定位】由 most runners 和 running 定位到第一段第一句。
【解析】**A)**。推理判断题。由定位句可知,大部分跑步者,无论是为跑马拉松而训练还是仅仅出去活动一下,在跑步之前都会做一些伸展运动。因此,A)为正确答案。

22.【定位】由 USATF 和 stretch before running 定位到第二段。
【解析】**C)**。推理判断题。由定位段第二句可知,在一项有 2 700 多名跑步者参与的研究中,科学家发现,无论是跑着玩的人还是竞技马拉松运动员,那些跑步之前做伸展运动的和没有做伸展运动的受伤比例相似,大约是 16%。因此,C)为正确答案。

23.【定位】由 the third paragraph 定位到第三段。
【解析】**D)**。推理判断题。由定位段第二、三句可知,一项针对英国军队中的新兵进行的研究发现,定期在训练前做伸展运动使运动伤害率从 6% 降低到 1%,而针对体操运动员、足球运动员和摔跤运动员进行的研究表明,伸展运动对运动表现根本没有影响。因此,D)为正确答案。

24.【定位】由 Dr. Daniel Pereles' research 定位到第四段最后一句。

【解析】A)。细节辨认题。由定位句可知,Pereles 想专门了解拉伸腿部肌肉,如四头肌、腘绳肌腱以及小腿肌肉对运动伤害是否会有影响。因此,A)为正确答案。

25.【定位】由 interesting 和 Pereles' findings 定位到第六段第三句。

【解析】A)。推理判断题。由定位句可知,有意思的是,Pereles 发现,那些从原先做伸展运动改为不做或者从原先不做改为有规律地做伸展运动的人更有可能受伤。所以,A)为正确答案。

参考译文

(21)大多数跑步者,无论是为跑马拉松而训练还是仅仅出去活动一下,在跑步之前都会做一些伸展运动。这种惯例近乎神圣,且与这一直觉紧密相连:在跑步前活动一下全身的肌肉有助于避免在跑步过程中对自己造成伤害。

但是,乔治·华盛顿大学和美国田径协会的研究人员在报告中称,跑步前的伸展运动似乎一点也没有减少运动伤害。(22)实际上,参与这项研究的 2 700 多名跑步者中,既有跑着玩的人,也有竞技马拉松运动员,他们每人每周至少跑 10 英里,科学家发现,那些跑步前做伸展运动的和不做伸展运动的跑步者在为期 3 个多月的锻炼中的运动伤害比率相似,大约是 16%。

做伸展运动基于这样一种想法:拉长肌肉纤维从而增强其功能,并希望因此改善运动表现,帮助跑步者保持更快的速度或者延长跑步时间。(23)一项针对英国军队中的新兵进行的研究发现,定期在训练前做伸展运动的习惯使运动伤害率从 6% 降低到 1%。然而,其他针对体操运动员、足球运动员和摔跤运动员进行的一些近期的研究却使这种惯常做法受到质疑,这些研究表明伸展运动对运动表现根本没有影响。

这就是 Daniel Pereles 博士(他自己也是一名跑步者)决定要专门研究一下伸展运动到底对跑步中受到的伤害有何影响的原因。多数关于该课题的研究,其中包括那个在英国军队中进行的试验,涉及多种伸展运动习惯,这些习惯不仅包括伸展跑步活动中使用的肌肉群,还包括很多其他肌肉群。研究还涉及健美操和其他运动。(24)Pereles 想专门了解拉伸腿部肌肉,如四头肌、腘绳肌腱以及小腿肌肉对运动伤害是否会有影响。

通过美国田径协会,Pereles 得以招募到足够的各种水平的跑步者来寻找问题的答案。在 2 729 名志愿者中,大约一半的人在跑步前被要求伸展四头肌、腘绳肌腱以及小腿肌肉 3 到 5 分钟,无论他们通常锻炼多长时间。另一半志愿者被告知跑步前不做伸展运动。

虽然他发现伸展运动对这两组运动员的伤害率没有任何影响,但是他确实发现有几种因素看起来的确影响跑步者是否会伤到自己。身体肥胖者以及那些最近受过伤的人更有可能伤害到自己。(25)有意思的是,Pereles 还发现,那些从原先做伸展运动改为不做或者从原先不做改为有规律地做伸展运动的人更有可能受伤。原先做伸展运动的人在为期 3 个月的研究中不再做伸展运动,之后他们的受伤率增加了 40%,而那些原先不做伸展运动而现在做伸展运动的人,他们的受伤率增加了 22%。

Passage 4

答案解析

26.【定位】由 Ethan was "an encyclopedia" 定位到第一段第二句。

【解析】B)。语义理解题。由定位句可知,Ethan 是个电视迷,各种各样的八卦新闻、电视节目,他都知道。B)中的 pointless 是对定位句中的 meaningless 的同义转述。因此,B)为正确答案。

27.【定位】由 the second paragraph 定位到第二段。

【解析】**D**)。细节辨认题。由定位段第三、四句可知,现在的家长喜欢用一些小恩小惠哄孩子好好表现。因此,D)为正确答案。

28.【定位】由"slacking"定位到第三段倒数第二句。

【解析】**A**)。语义理解题。第三段主要讨论给孩子物质奖励对孩子学习表现的负面影响,由此推测 slacking 含有贬义色彩。定位句意为:家长们预言,一旦奖励消失,将会出现大范围的_____。结合句意可知,A)为正确答案。

29.【定位】由 the result 和 the Harvard economist's experiment 定位到第四段。

【解析】**C**)。推理判断题。由定位段第四句可知,结论是:给钱这一办法远远不够。因此,C)为正确答案。

30.【定位】由 the best title 定位到整篇文章。

【解析】**A**)。主旨大意题。通读全文可知,作者探讨了物质奖励对教育孩子是否有效、是否可行这一问题,因此 A)最适合作为本文的题目。

参考译文

初中时,我有一个同学看电视成瘾,在那时这是很正常的事情。(26)这个男孩,我们就叫他 Ethan 吧,对那些毫无意义的事情简直无所不知,从"天龙特攻队"到"谁是老板?",没有他不知道的。一天,Ethan 的妈妈做了个大胆的尝试:如果 Ethan 能够一个月不看电视,她就给他 200 美元。我们都不相信 Ethan 能做到。但是,Ethan 真的戒掉了电视。他朋友曾经邀他在周五晚上到自己家去看电视,Ethan 拒绝了。一个月之后,他妈妈奖励他 200 美元。Ethan 立刻出去买了一台他能找到的最大的电视。

有了孩子之后,成年人就一直试图让孩子听话。《圣经》反复要求孩子听父母的话,并建议用石头砸死那些不听话的孩子,或者至少让鸟把他们的眼睛啄出来。但是几个世纪以来,棍棒已经不受欢迎了,大多数情况下,更受欢迎的是胡萝卜。(27)今天,在孩子还不能说几句完整的话时,家长就开始用那些小恩小惠来哄孩子,如学会上厕所就会得到一张贴画,在教堂里安静地坐着就会得到一块饼干。

近年来,数百所学校使这类交易更加讲究实际,尝试用给孩子冷冰冰的现金的方式来鼓励孩子来学校上课或者是取得好成绩。我还没见到一个不喜欢这种方式的孩子,但是对于这一做法,家长们感觉极不舒服。老师们抱怨我们对孩子去做那些他们本该出于自己意愿去做的事情作出了奖赏。心理学家警告说,这种现金奖励的方式实际上会贬低学习这一行为的价值,从而使孩子们表现更糟。(28)家长们预言,一旦奖励消失,将出现普遍的懈怠现象。对这一问题的讨论已经成为对一个更有广泛意义的问题的争论的战场:尽管我们已经进行了几十年的教育改革,财政预算也在不断增加,但孩子们的学习表现却没有很大的改观,这是为什么呢?

但是一直以来,尤其在美国那些表现欠佳的学校中,真正的问题只有一个:这样诱惑孩子真的有用吗?为了弄清楚这一问题,哈佛一位经济学家做了一些教育研究者几乎从没做过的事:他在多个城市数百个课堂上进行了一个随机的试验。他主要用自己的钱给 18 000 个孩子总计 630 万美元,并且找到一组研究人员帮助他分析结果。(29)结论是:给钱这一办法远远不够。但对一些孩子,可能会起到一些作用。最后,我们都希望我们的孩子成长为自我激励的成年人。问题是,我们如何才能帮助他们做到这一点呢?
